We spend much of our time sitting.

So, as rapido®, we are trying hard for your comfort. We constantly follow the innovations in the sector or your comfort with the help of our designers, Research & Development department and specialized production team.

We produce various alternatives to be able to provide functional seating solutions which are suitable for you.

So, you will find the best ergonomic and customized options in rapido®.

customized
ergo—nomic solutions

A story which begins with an empty paper turns into a comfortable work chair in an office or a comfortable sofa in a cinema hall. It's the result of an excellent teamwork of rapido®'s engineering, design and production teams to manage this process in a planned and faultless way from the starting point till the end.

Above all, needs are determined through the researches which are carried out by our Research & Development department. These needs are examined and finalized by the users in the meetings which are held in focus groups.

Then, first sketches are created by our design

team. After demo productions of the chosen designs, serial production starts for the agreed model.

After that, rapido®'s expert team starts working in order to be able to make production in the best way.

We are trying hard to improve this process further starting from design to production by emphasizing solution offers, alternative product options and ergonomics in order to provide 100 % customer satisfaction as well as the most appropriate products and service.

a creativ—e process
from sketch to product

CREATIVE STUDIO

Working, for some of us, means spending much more time than we spend at home...

Although long working hours seem difficult, modern Office environments are designed in a way that will comply with today's circumstances in order to give much more comfort to us.

rapido® carries out the production of Office chairs, which is a leading factor which affects your efficiency in the office, in its Office located in an area of 10,000 m² with its expert staff and most importantly by

carrying out intensive Research & Development studies which are based on such concepts as human health, comfort and ergonomics.

Product range is arranged in accordance with Research & Development studies which are carried out in certain intervals. Models are composed of hundreds of chairs which have been designed by combining aesthetic and ergonomics in order to offer alternative options for different tastes.

rapido® has been working

for your working more easily and has been offering seating solutions for your comfort since its foundation.
